

The ACGME's Initiatives on Well-Being

Our Mission

“We improve health care and population health by assessing and advancing the quality of resident physicians' education through accreditation. ”

ACGME Mission Statement

ACGME's Four Philosophical Pillars

- Excellence in the safety and quality of care rendered to patients by residents today
- Excellence in the safety and quality of care rendered to patients by today's residents in their future practice
- Excellence in professionalism through faculty modeling of:
 - The effacement of self-interest in a humanistic environment that supports the professional development of physicians
 - The joy in curiosity, problem-solving, intellectual rigor, and discovery
- Commitment to the well-being of the residents, faculty members, students, and all members of the health care team

We are aware that the ACGME
cannot solve this challenge
alone.

ACGME's Strategy and Role in Resident Physician Well-Being

Address the need in the Graduate Medical Education Community

Convene and support the GME Community

- Internal Task Force to understand the scope of resident and physician suicide
- “Call to Arms” at the March, 2015 Annual Educational Conference
- Formation of an ACGME Board Task Force on Physician Well-Being
- Annual ACGME Symposia on Physician Well-Being starting in 2015
- Remolding of CLER Visit Program to include Clinician Well-Being 2016
- Revision of the Common Program Requirements, 2015-Present
 - Common Framework to Address Context
- Disseminate tools, salutary practices, new knowledge
 - To Bring About Culture Change

SYMPOSIUM ON PHYSICIAN WELL-BEING

FIRST ANNUAL SYMPOSIUM: NOVEMBER 17-18, 2015

SECOND ANNUAL SYMPOSIUM: NOVEMBER 30 -DECEMBER 1, 2016

THIRD ANNUAL SYMPOSIUM: NOVEMBER 29-30, 2017

2017 Symposium Planning Committee

2017 Symposium

Goals

1. Highlight **successes** in physician well-being at various levels—from personal to organizational—and identify common themes, processes, and replicable strategies.
2. Understand the **science of connectivity** and its importance to physician well-being
3. Advise the ACGME on ways to serve as an effective agent of positive transformational change for resident well-being via the **creation of more connected and inclusive training environments**

2017 Symposium

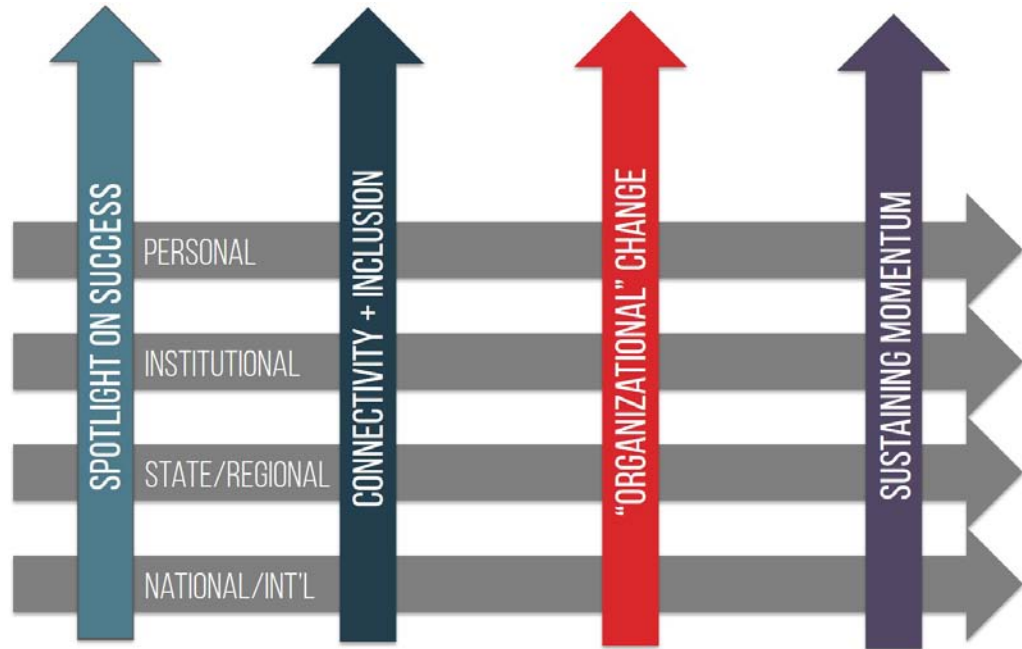

Goals (continued)

4. Explore how **organizational change principles and strategies** can be applied to creating and sustaining programs to support physician well-being
5. Identify opportunities to **sustain the momentum of this symposium** and apply the lessons learned to programs, institutions, and organizational cultures.

2017 Symposium Focus Areas

- Success
- Connectedness & Inclusion
- Organizational Change
- Momentum

Tools and Resources

For Resident and Faculty Member Well-Being

Tools and Resources Subgroup

Common Program Requirements

Section VI

VI.C. Well-Being

In the current healthcare environment ... Programs, in partnership with their Sponsoring Institutions, have the same responsibility to address well-being as they do to evaluate other aspects of resident competence.

VI.C.1. This responsibility must include:

VI.C.1.e) attention to resident and faculty member burnout, depression, and substance abuse. The program, in partnership with its Sponsoring Institution, must educate faculty members and residents in identification of the symptoms of burnout, depression, and substance abuse, including means to assist those who experience these conditions. Residents and faculty members must also be educated to recognize those symptoms in themselves and how to seek appropriate care. The program, in partnership with its Sponsoring Institution, must: ^(Core)

Common Program Requirements

Section VI

VI.C.1.e)

Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance abuse. Materials and more information are available on the Physician Well-Being section of the ACGME website (<http://www.acgme.org/What-We-Do/Initiatives/Physician-Well-Being>).

Tools and Resources Selection Criteria

1. Five Content Areas

- Directly related to Section VI requirements
- Items from Sections I-V may be addressed in the future

2. Must be useful to a broad, external audience

3. May be either Open-Access or Proprietary

4. Must have been created for—or used with—physicians

5. Preference given to tools and resources with existing validity evidence

Tools and Resources

Five Content Areas

1. Identifying and Addressing Burnout
2. Promoting Well-Being
3. Assessing and Addressing Emotional and Psychological Distress / Depression / Suicide
4. Improving the Learning and Working Environment
5. Coping with Tragedy

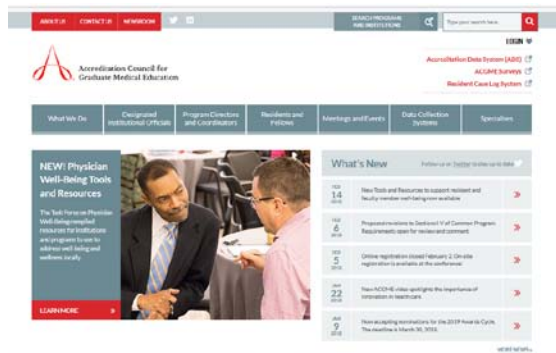

Tools and Resources

Website Update

- **Designed to make tools and resources accessible and easy to find**
- **Identifies each tool or resource by type of use**
(screening / survey instrument, educational module, etc.)
- **Designates proprietary items, as such**

www.acgme.org

The screenshot shows the ACME website homepage. At the top, there is a navigation bar with links for 'ABOUT US', 'CONTACT US', 'NEWSROOM', and 'REQUEST A SERVICE'. Below this is the ACME logo and the text 'Accreditation Council for Graduate Medical Education'. A search bar is located in the top right corner. The main content area is divided into several sections: 'What We Do' with sub-sections for 'Designated Institutional Officers', 'Program Directors and Coordinators', 'Residents and Fellows', 'Meetings and Events', 'Data Collection Systems', and 'Specialties'; 'NEW! Physician Well-Being Tools and Resources' featuring a photo of two men in a meeting; and 'What's New' with a list of recent updates including 'New Tools and Resources to support resident and faculty member well-being activities', 'Proposed revisions to Section 17 of Common Program Requirements open for review and comment', 'Online registration closed February 2, Graduate registration is available at the end of the month', 'New ACME+ video spotlight the importance of innovation in healthcare', and 'New Accreditation Requirements for the 2019 Accreditation Cycle, This deadline is March 30, 2019'.

This banner features a photograph of a male and a female physician in white coats looking at a tablet. To the right of the photo is the text: 'Site Visit: The accreditation process for programs and sponsoring institutions includes periodic on-site visits to ensure compliance with the Program and Institutional Requirements. All accreditation site visits for programs are sponsored by institutions and are performed by a member of the Accreditation Council and a representative of the ACME.' Below the text is a 'LEARN MORE' link. On the right side of the banner is a world map with the ACME logo overlaid and the text 'Visit the ACME International Website'.

Tools and Resources

ACGME Tools and Resources for Resident and Faculty Member Well-Being

The ACGME Task Force on Physician Well-Being Tools and Resources Subcommittee created this compilation of resources and other references for resident and faculty members as a resource for well-being, wellness, and related topics. It is the Task Force's hope that these resources will support the efforts of:

- 1) Medical and ACGME General Program Requirements. The requirements emphasize that institutional, medical, and personal well-being are critical to the development of the concerted, caring, and medical education.

The Task Force assembled this list of resources to help program and institution identify solutions that best meet these needs. Besides the ACGME and the Task Force website, the use of social media resources.

These resources can be used as part of program and institutional efforts to improve faculty member and resident health and wellness. Resources can include, but are not limited to, the use of digital content related to learning and well-being, and to assisting or assisting Residents, Faculty, faculty members, or others in distress.

All of the tools and resources included have been reviewed for relevance to graduate medical education settings. This compilation includes case-based, text-based resources, as well as programs that use social programs, tools, and materials.

We invite program and institutional representatives to submit observations of the tools, resources, and programs that have been effective in their organization and/or other programs to help with ongoing learning.

Identifying and Addressing Burnout

This section includes a brief overview of the concept of burnout, a list of strategies for identifying and addressing burnout, and a list of resources for further information. It also includes a list of resources for further information.

Promoting Well-Being

This section includes a brief overview of the concept of well-being, a list of strategies for promoting well-being, and a list of resources for further information. It also includes a list of resources for further information.

Assessing and Addressing Emotional and Psychological Distress/Depression/Suicidal

This section includes a brief overview of the concept of emotional and psychological distress, a list of strategies for assessing and addressing emotional and psychological distress, and a list of resources for further information. It also includes a list of resources for further information.

Improving the Learning and Working Environment

This section includes a brief overview of the concept of learning and working environment, a list of strategies for improving the learning and working environment, and a list of resources for further information. It also includes a list of resources for further information.

Coping with Tragedy

This section includes a brief overview of the concept of coping with tragedy, a list of strategies for coping with tragedy, and a list of resources for further information. It also includes a list of resources for further information.

Other Institutional/Purpose Sites and Resources

This section includes a list of other institutional/purpose sites and resources.

- Academy of Emergency Medicine - Division: Task Force (Collection of Resources)
- Academy of Geriatric Medicine - Curriculum for the Residency Program Through Relationship-Centered Communication (Collection of Resources)
- ACGME - CME Pathway to Excellence Version 1.0 (Collection of Resources)
- Alliance for Academic Internal Medicine - Guidelines for Training and Retention in Pediatric Critical Care Medicine (Collection of Resources)
- American College of Emergency Physicians - Wellness (Email: Collection of Resources of Physician Well-Being)
- American Psychiatric Association (Operational Interventions for Burnout) - Toolkit for Well-Being (Collection of Resources)

Identifying and Addressing Burnout

Tools and resources in this content area provide suggestions that may help in identifying and addressing burnout in residents, fellows, and faculty members. Information on program- and institution-level interventions to reduce burnout and increase engagement can also be found in the section on "Improving the Learning and Working Environment."

Promoting Well-Being

Section VI of the ACGME's Common Program Requirements states, "*Self-care is an important component of professionalism, [and] a skill that must be learned and nurtured in the context of other aspects of residency training.*" These items may be useful as part of the process to assess and enhance physician physical, psychological, and emotional well-being.

Assessing and Addressing Emotional and Psychological Distress/Depression/Suicide

This section is designed to provide select resources to help identify, assess, and assist individuals with emotional and/or psychological distress, and to provide education to reduce the stigma of seeking mental health care. Screening tools for depression and suicidal ideation should not be used for self-screening, but can be part of a comprehensive effort to link such tools to mental health resources at a local level. For example, the American Foundation for Suicide Prevention's Interactive Screening Program links individuals with a health care provider who screens results. It is also important to note that only a qualified health care professional can diagnose or treat depression or other forms of mental illness.

Section VI of the ACGME's Common Program Requirements mandates access to confidential, affordable mental health assessment, counseling, and treatment, including urgent and emergent care.

Improving the Learning and Working Environment

The ACGME Common Program Requirements state, "*The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients.*" Tools and resources in this content area offer guidance to programs and institutions on ways to enhance the focus on well-being in their unique learning and working environment.

Coping with Tragedy

Tools and resources in this section are designed to assist individuals, as well as programs and communities, in coping with a tragedy or disaster. Resources focus on communication, crisis response, and mitigating the psychological and psychosocial consequences of the event.

Information about concerns or complaints relating to a program.

Tools and Resources

ACGME Tools and Resources for Resident and Faculty Member Well-Being

The ACGME's Task Force on Resident Well-Being Tools and Resources Documentation created this compilation of resources and other references for residents and faculty members as a resource for well-being, wellness, and related topics. It is the Task Force's hope that these resources will support the efforts in:

1. Addressing the needs of ACGME's General Program Residency Programs. The requirements emphasize that institutional, residential, and well-being are critical to the development of the curriculum, teaching, and medical education.

The Task Force assembled this list of resources to help program and institution identify solutions that have been most successful. Review the ACGME and the Task Force website and the use of our specific toolset resources.

These resources can be used as part of program and institutional efforts to improve faculty member and resident well-being. Resources are organized by general topic but can be used for a variety of purposes including well-being and addressing an existing resident/faculty, faculty member, or others in distress.

All of the tools and resources included have been reviewed for relevance to graduate medical education settings. This compilation includes case-based, third resources, as well as proprietary (like social programs) tools and materials.

We invite program and institutional representatives to submit observations of the tools, resources, and strategies that have been most effective in their organizations and/or GME programs to help with ongoing work.

Identifying and Addressing Burnout

Tools and resources to help identify and address burnout in residents and faculty members. Includes well-being resources, wellness and health resources, and resources that help residents and faculty members to address burnout and improve their well-being.

Promoting Well-Being

Tools and resources to help promote well-being in residents and faculty members. Includes well-being resources, wellness and health resources, and resources that help residents and faculty members to address burnout and improve their well-being.

Assessing and Addressing Emotional and Psychological Distress/Depression/Suicidal

Tools and resources to help assess and address emotional and psychological distress/depression/suicidal. Includes well-being resources, wellness and health resources, and resources that help residents and faculty members to address burnout and improve their well-being.

Improving the Learning and Working Environment

Tools and resources to help improve the learning and working environment. Includes well-being resources, wellness and health resources, and resources that help residents and faculty members to address burnout and improve their well-being.

Coping with Tragedy

Tools and resources to help cope with tragedy. Includes well-being resources, wellness and health resources, and resources that help residents and faculty members to address burnout and improve their well-being.

Other Institutional/Faculty Sites and Resources

Tools and resources to help address other institutional/faculty sites and resources. Includes well-being resources, wellness and health resources, and resources that help residents and faculty members to address burnout and improve their well-being.

Tools and Resources

ACGME Tools and Resources for Resident and Faculty Member Well-Being

The ACGME's Tool Force on Physician Well-Being Tools and Resources Subcommittee created this compilation of evidence and peer-reviewed literature for resident and faculty members as a resource for well-being, wellness, and related tools. It is the Tool Force's hope that these resources will support the efforts in:

- 1) Addressing the well-being of residents and faculty members.
- 2) Addressing the well-being of the program and institution.

The Tool Force assembled this list of resources to help program and institution leaders identify solutions that have been developed. Review the ACGME and the Tool Force website for the use of the specific tool resources.

These resources can be used as part of program and institutional efforts to improve faculty member and resident well-being. Resources are subject to periodic update because of their continuous nature for learning and well-being and to address an ever-changing healthcare delivery, faculty member, and trainee workforce.

All of the tools and resources included have been reviewed for relevance to graduate medical education settings. This compilation includes case-based tool resources, as well as programs that use specific programs, tools, and materials.

We invite program and institutional representatives to submit observations of the tools, resources, and strategies that have been effective in their organizations and to give us input to help improve our tool resources.

Identifying and Addressing Burnout

This tool resource is for program and institution leaders to help identify and address burnout in residents, faculty, and trainees. It includes information on program and institution data that can be used to assess burnout and to address burnout in residents, faculty, and trainees. It also includes information on program and institution data that can be used to assess burnout and to address burnout in residents, faculty, and trainees.

Promoting Well-Being

This tool resource is for program and institution leaders to help promote well-being in residents, faculty, and trainees. It includes information on program and institution data that can be used to assess well-being and to address well-being in residents, faculty, and trainees. It also includes information on program and institution data that can be used to assess well-being and to address well-being in residents, faculty, and trainees.

Assessing and Addressing Emotional and Psychological Distress/Depression/Suicidal Thoughts

This tool resource is for program and institution leaders to help assess and address emotional and psychological distress, depression, and suicidal thoughts in residents, faculty, and trainees. It includes information on program and institution data that can be used to assess emotional and psychological distress, depression, and suicidal thoughts in residents, faculty, and trainees. It also includes information on program and institution data that can be used to assess emotional and psychological distress, depression, and suicidal thoughts in residents, faculty, and trainees.

Improving the Learning and Working Environment

This tool resource is for program and institution leaders to help improve the learning and working environment in residents, faculty, and trainees. It includes information on program and institution data that can be used to assess the learning and working environment in residents, faculty, and trainees. It also includes information on program and institution data that can be used to assess the learning and working environment in residents, faculty, and trainees.

Coping with Tragedy

This tool resource is for program and institution leaders to help cope with tragedy in residents, faculty, and trainees. It includes information on program and institution data that can be used to assess coping with tragedy in residents, faculty, and trainees. It also includes information on program and institution data that can be used to assess coping with tragedy in residents, faculty, and trainees.

Other Institutional/Program Sites and Resources

This tool resource is for program and institution leaders to help identify other institutional/program sites and resources. It includes information on program and institution data that can be used to identify other institutional/program sites and resources. It also includes information on program and institution data that can be used to identify other institutional/program sites and resources.

Fostering Meaning in the Learning Environment

BACK TO BEDSIDE

The ACGME Council of Review Committee Residents (CRCR) designed the “*Back to Bedside*” initiative to empower residents and fellows to develop transformative projects that combat burnout by fostering meaning in their learning environments; engaging on a deeper level with what is at the heart of medicine: their patients.

The ACGME received 223 proposals focusing on:

- Creating opportunities for more time engaged in direct, meaningful patient care
- Developing a shared sense of teamwork and respect among colleagues
- Decreasing effort spent on non-clinical, administrative responsibilities
- Fostering a supportive, collegial environment
- Increasing patient satisfaction through more meaningful time with their care delivery team

CLER PATHWAYS TO EXCELLENCE

Expectations for an optimal clinical
learning environment to achieve safe
and high quality patient care

Version 1.1

Table of Contents

Introduction.....	4
Patient Safety.....	9
Health Care Quality.....	15
Care Transitions.....	20
Supervision.....	25
Well-being (Selected Topics).....	30
Professionalism (Selected Topics).....	35

Well-being (Selected Topics)

The delivery of safe and high quality patient care on a consistent and sustainable basis can only be rendered when the well-being of clinical care providers is assured. The optimal clinical learning environment is engaged in systematic and institutional strategies and processes to cultivate and sustain the well-being of both its patients and clinical care team.

WB Pathway 1: Clinical learning environment promotes well-being across the clinical care team to ensure safe and high quality patient care

PROPERTIES INCLUDE:

- The clinical site creates a supportive clinical care community that is free of stigma, safe, and embraces, promotes, and supports well-being.
- Leadership engages front-line health care providers in designing and developing priorities and strategies that support well-being.
- The clinical site builds awareness and educates the clinical care team on the risks, signs, symptoms, and recognition of fatigue in the context of patient care specific to the clinical site.
- The clinical site builds awareness and educates the clinical care team on the risks, signs, symptoms, and recognition of burnout in the context of patient care specific to the clinical site.
- Clinical learning environment and GME leadership demonstrate behaviors that promote well-being, thereby serving as role models for the clinical care team.

WB Pathway 2: Clinical learning environment demonstrates specific efforts to promote the well-being of residents, fellows, and faculty members

PROPERTIES INCLUDE:

- Leadership engages residents, fellows, and faculty members in designing, developing, and continually stewarding priorities and strategies that support well-being.
- Clinical learning environment demonstrates continuous effort to support programs and activities that enhance the physical and emotional well-being of residents, fellows, and faculty members.

WB Pathway 3: Clinical learning environment promotes an environment where residents, fellows, and faculty members can maintain their personal well-being while fulfilling their professional obligations

PROPERTIES INCLUDE:

In the context of patient care specific to the clinical site and in collaboration with the GME community, the clinical learning environment:

- Establishes organizational expectations for resident, fellow, and faculty member workload—duration and intensity—consistent with safe and high quality care for their patients and the educational needs of GME.
- Identifies and monitors patient care activities by residents, fellows, and faculty members that exceed the expectations of duration and intensity (volume and complexity) set by the clinical learning environment.
- Demonstrates continued improvement efforts to eliminate work-related activities that exceed the expectations of duration and intensity (volume

WB Pathway 4: Clinical learning environment demonstrates system-based actions for preventing, eliminating, or mitigating impediments to the well-being of residents, fellows, and faculty members

PROPERTIES INCLUDE:

In the context of patient care specific to the clinical site and in collaboration with the GME community, the clinical learning environment:

- Promotes resilience training that is interprofessional and includes residents, fellows, and faculty members to ensure the safe and effective care of their patients.
- Ensures systems are in place to actively recognize and mitigate fatigue among residents, fellows, and faculty members.
- Ensures systems are in place to actively recognize and alleviate burnout among residents, fellows, and faculty members.
- Identifies GME-related systems and processes that may impede well-being in the clinical learning environment and works with the Sponsoring Institution to eliminate these impediments.
- Identifies clinical site-related systems and processes that may impede well-being in the clinical learning environment and works to eliminate these impediments.

WB Pathway 5: Clinical learning environment demonstrates mechanisms for identification, early intervention, and ongoing support of residents, fellows, and faculty members who are at risk of or demonstrating self-harm

PROPERTIES INCLUDE:

In the context of patient care specific to the clinical site and in collaboration with the GME community, the clinical learning environment:

- Builds awareness and educates the clinical care team on the risks, signs, symptoms, and recognition of those who are at risk of or demonstrating self-harm.
- Ensures confidentiality and actively facilitates early detection of residents, fellows, and faculty members at risk of or demonstrating self-harm.
- Establishes systems or processes that provide residents, fellows, and faculty members at risk of or demonstrating self-harm confidential access to treatment and other related services that is commensurate with occupational and personal needs.
- Effectively addresses the emotional needs of its residents, fellows, and faculty members in relation to catastrophic work-related events (in the course of patient care or among the members of the clinical care team).

Well-being (Selected Topics) CONTINUED

WB Pathway 6: Clinical learning environment monitors its effectiveness at achieving the well-being of the clinical care team

PROPERTIES INCLUDE:

In the context of patient care specific to the clinical site and in collaboration with the GME community, the clinical learning environment:

- Actively monitors and assesses the effectiveness of its efforts to promote the optimal integration of work with personal needs related to self, family, friends, and community.
- Actively monitors and assesses the effectiveness of its efforts to eliminate harm to patients due to clinician fatigue.
- Actively monitors and assesses the effectiveness of its efforts to eliminate harm to patients due to clinician burnout.
- Actively monitors and assesses the effectiveness of its efforts to assess and provide care for those who are at risk of or demonstrating self-harm.

NAM Action Collaborative

Steering Committee

Team of 12 people:

- Leadership Team
- Two leads from each of 4 working groups
- One early career professional

Works to:

- Provide support and strategic direction for the Collaborative
- Organize 2-3 public meetings per year
- In conjunction with public meetings, meet in-person to:
 - Discuss progress and direction of workgroups
 - Determine if Collaborative is meeting anticipated goals

NAM Action Collaborative

Working Groups

1. Research, Data, and Metrics
2. Conceptual Model
3. Messaging and Communications
4. External Factors and Workflow

NAM Action Collaborative

Working Groups (continued)

Teams of 12-15 people:

1. NAM Staff Leads (x1-2)
2. Work Group Leads (x2)
3. Collaborative Participants

Specific to Each Group:

- Mission and Goals
- Anticipated Products
- Two-Year Timeline
- Monthly Calls (to discuss products and progress)

NAM Action Collaborative December Meeting Agenda

 **National Academy of Medicine**
Action Collaborative on
Clinician Well-Being and Resilience

Closed Meeting
December 14-15, 2017
Keck Center - 500 Fifth Street, NW
Washington, DC 20001

December 14, 2017

6:00-8:00pm **Networking Dinner (Carmine's; 425 7th St NW)**
Objective: Highlight parallels between the efforts to promote lawyer well-being and clinician well-being, and identify what challenges or potential solutions are unique to each group and what are transferable

- Bree Buchanan, Co-Chair, National Task Force on Lawyer Well-Being, American Bar Association

December 15, 2017

8:00-9:30am **Steering Committee meets over breakfast (Keck 101)**

Moderators:

- Victor Dzau, President, NAM and chair, Action Collaborative on Clinician Well-Being and Resilience
- Charlee Alexander, Program Officer, NAM

8:30-9:30am **Networking breakfast for working group participants (Keck 100)**

9:30-10:30am **Resources in development by working groups (Keck 100)**
Objective: Full group discussion on the progress and direction of the action collaborative working groups. *Format: 5 min presentations and 10 mins. of feedback for each working group*

Moderators:

- Darrell Kirch, President and CEO, AAMC and co-chair, Action Collaborative on Clinician Well-Being and Resilience
- Thomas Nasca, CEO, ACGME and ACGME International, and co-chair, Action Collaborative on Clinician Well-Being and Resilience

10:30-11:30am **Armchair discussion with practice managers (Keck 100)**
Objective: Explore the effects of increased documentation requirements on daily practice, patient care, and patient outcomes; and share solutions and special considerations for interventions.

Moderator: Janis Orlowski, Chief Health Care Officer, AAMC

Speakers:

- Peter Basch, Senior Director, IT Quality and Safety, Research, and National Health IT Policy, MedStar Health
- Steven Kravet, President, Johns Hopkins Community Physicians
- Nizar Jarjour, President, University of Wisconsin Health

11:30-12:00pm **Findings from the field**

- Bernadette Melnyk, VP for Health Promotion, University Chief Wellness Officer, Dean and Professor, College of Nursing, Ohio State University
 - o A National Study of Nurses' Health and its Link to Medical Errors and Worksite Wellness
- Chris Sinsky, VP of Professional Satisfaction, American Medical Association
 - o Results from several studies concerning the business case for investing in burnout, career plans for US physicians, time spent in the EHR, licensure, and metrics for professional satisfaction

12:00-12:30pm **Networking break and pick up lunch (Keck 100 pre-function area)**

12:30- 1:30pm **Looking Ahead (Keck 100)**

- Victor Dzau, President, NAM and chair, Action Collaborative on Clinician Well-Being and Resilience
 - o NAM staff transitions
 - o Capitalizing on the progress and momentum of the collaborative; extending the collaborative and launching a parallel consensus study
- Sharyl Nass, Director, Board on Health Care Services, Health and Medicine Division
 - o Statement of task for a consensus study

1:30-1:45pm **Transition break**

1:45-2:45pm **Cross-working group sessions with patient/consumer representatives**
Objective: Patient/consumer representatives recommend guiding principles for the working group participants and share feedback on the action collaborative resources in development

- Alan Balch, CEO, Patient Advocate Foundation (Group 1, Keck 101)
- Andrea Borondy Kitts, Patient Outreach & Research Specialist, Lahey Hospital & Medical Center (Group 3, Keck 106)
- Tiffany Christiansen, Vice President – Experience Innovation, The Beryl Institute (Group 4, Keck 201)
- Dava deBronk, Cancer Survivor (Group 4, Keck 201)
- Randolph Fenninger, CEO, National Blood Clot Alliance (Group 2, Keck 105)

2:45-3:00pm **Transition to working group meetings**

3:00-4:30pm **Working groups meet individually**

- Research, Data, and Metrics (Keck 105)
- Conceptual Model (Keck 106)
- External Factors and Workflow (Keck 101)
- Messaging and Communications (Keck 201)

4:30-5:30pm **Farewell reception for Kimber Bogard, Senior Officer, NAM (Keck 100)**

5:30pm **Adjourn**

PERSPECTIVE

COLLECTIVELY CONFRONTING THE CLINICIAN-BURNOUT CRISIS

To Care Is Human — Collectively Confronting the Clinician-Burnout Crisis

Victor J. Dzau, M.D., Darrell G. Kirch, M.D., and Thomas J. Nasca, M.D.

The ethical principles that guide clinical care — a commitment to benefiting the patient, avoiding harm, respecting patient autonomy, and striving for justice in health care — affirm the moral foundation and deep meaning underlying many clinicians' view of their profession as a worthy and gratifying calling. It is clear, however, that owing to the growing demands, burdensome tasks, and increasing stress experienced by many clinicians, alarmingly high rates of burnout, depression, and suicide threaten their well-being. More than half of U.S. physicians report significant symptoms of burnout — a rate more than twice that among professionals in other fields. Moreover, we know that the problem starts early. Medical students and residents have higher rates of burnout and depression than their peers who are pursuing nonmedi-

cal careers in terms of both human cost and system inefficiency.¹ Nothing puts these consequences into starker relief than the devastating rates of suicide among physicians. As many as 400 U.S. physicians die by suicide every year.² Nearly every clinician has been touched at some point by such a tragedy.

Not only are clinicians' lives at risk, so is patient safety. Some studies have revealed links between clinician burnout and increased rates of medical errors, malpractice suits, and health care-associated infections. In addition, clinician burnout places a substantial strain on the health care system, leading to losses in productivity and increased costs. Burnout is independently associated with job dissatisfaction and high turnover rates. In one longitudinal study, the investigators calculated that annual productivity

decreases among burned-out physicians, and specialties to confront the crisis. But no single organization can address all the issues that will need to be explored and resolved. There is no mechanism for systematically and collectively gathering data on, analyzing, and mitigating the causes of burnout. The problem is not lack of concern, disagreement about the severity or urgency of the crisis, or absence of will to act. Rather, there is a need to coordinate and synthesize the many ongoing efforts within the health care community and to generate momentum and collective action to accelerate progress. Furthermore, any solution will need to involve key influencers beyond the health care community, such as information technology (IT) vendors, payers, regulators, accreditation agencies, policymakers, and patients.

We believe that the National

January 29, 2018

Introduction

A range of factors drives clinician burnout, including workload, time pressure, clerical burden, and professional isolation [1]. Clerical burden, especially documentation of care and order entry, is a major driver of clinician burnout. Recent studies have shown that physicians spend as much as 50 percent of their time completing clinical documentation [2]. Nurses similarly spend up to half their time fulfilling clinical documentation requirements and data entry for other demands such as quality reporting and meeting accreditation standards [3]. In the outpatient setting, patients will often describe clinical team members going through

Background

Clinician well-being and fulfillment in work is critical for patient safety and health system function [6]. Fulfillment in work has been ascribed to three factors: (1) mastery: competency and proficiency in the work to be done, (2) autonomy: having some element of influence over the way work is performed, and (3) purpose: a connection to filling a societal need in an environment where one's profession is honored and valued [7]. The current epidemic of clinician burnout is related to these factors. Clinicians increasingly feel burdened by administrative tasks that seem to not add value to patient care and are unrelated to the reasons they chose their professions. The disconnect between one's

January 29, 2018

Introduction

In 1999, the Institute of Medicine (IOM) released its landmark report, *To Err Is Human: Building a Safer Health System* [1], which revealed that a significant number of people die annually from medical errors. The report spurred two decades of action on the part of hospitals and health care professionals to improve patient safety. The IOM, renamed the National Academy of Medicine (NAM), is now addressing the issue of clinician well-being. The Action Collaborative on Clinician Well-Being and Resilience (the “action collaborative”) was launched in January 2017 in response to the burgeoning body of evidence that burnout is endemic

working population of emotional exhaustion (43.2 percent versus 24.8 percent), depersonalization (23.0 percent versus 14.0 percent), and overall burnout (48.8 percent versus 28.4 percent), and reported lower satisfaction with work-life balance (36.0 percent versus 61.3 percent), as measured by the Maslach Burnout Inventory (MBI) and two single-item measures adapted from the full MBI [4]. These effects were seen after controlling and adjusting for age, sex, relationship status, and hours worked per week. Despite recognition of the importance of clinician well-being, the ongoing exacerbation of burnout among physicians increased from 2012 to 2017 [5,6]. Nurses face similar challenges. Based on

NATIONAL ACADEMY OF MEDICINE

FACTORS AFFECTING CLINICIAN WELL-BEING AND RESILIENCE

EXTERNAL FACTORS

SOCIO-CULTURAL FACTORS

- Alignment of societal expectations and clinician's role
- Culture of safety and transparency
- Discrimination and overt and unconscious bias
- Media portrayal
- Patient behaviors and expectations
- Political and economic climates
- Social determinants of health
- Stigmatization of mental illness

REGULATORY, BUSINESS, & PAYER ENVIRONMENT

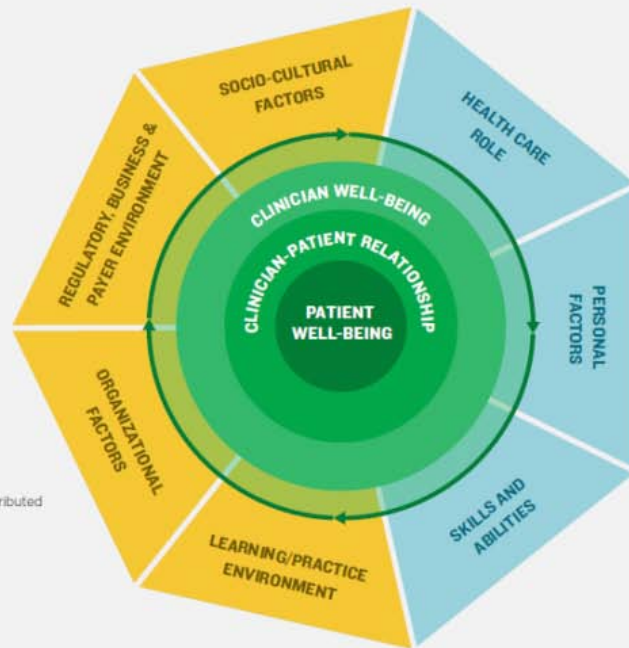

- Accreditation, high-stakes assessments, and publicized quality ratings
- Documentation and reporting requirements
- HR policies and compensation issues
- Initial licensure and certification
- Insurance company policies
- Litigation risk
- Maintenance of licensure and certification
- National and state policies and practices
- Reimbursement structure
- Shifting systems of care and administrative requirements

ORGANIZATIONAL FACTORS

- Bureaucracy
- Congruent organizational mission and values
- Culture, leadership, and staff engagement
- Data collection requirements
- Diversity and Inclusion
- Level of support for all healthcare team members
- Professional development opportunities
- Scope of practice
- Workload, performance, compensation, and value attributed to work elements

LEARNING/PRACTICE ENVIRONMENT

- Autonomy
- Collaborative vs. competitive environment
- Curriculum
- Health IT interoperability and usability/Electronic health records
- Learning and practice setting
- Mentorship
- Physical learning and practice conditions
- Professional relationships
- Student affairs policies
- Student-centered and patient-centered focus
- Team structures and functionality
- Workplace safety and violence

INDIVIDUAL FACTORS

HEALTH CARE ROLE

- Administrative responsibilities
- Alignment of responsibility and authority
- Clinical responsibilities
- Learning/career stage
- Patient population
- Specialty related issues
- Student/trainee responsibilities
- Teaching and research responsibilities

PERSONAL FACTORS

- Inclusion and connectivity
- Family dynamics
- Financial stressors/economic vitality
- Flexibility and ability to respond to change
- Level of engagement/connection to meaning and purpose in work
- Personality traits
- Personal values, ethics and morals
- Physical, mental, and spiritual well-being
- Relationships and social support
- Sense of meaning
- Work-life integration

SKILLS AND ABILITIES

- Clinical Competency level/experience
- Communication skills
- Coping skills
- Delegation
- Empathy
- Management and leadership
- Mastering new technologies or proficient use of technology
- Mentorship
- Optimizing work flow
- Organizational skills
- Resilience
- Teamwork skills
