

NATIONAL INITIATIVE VII MEETING TWO

Implementing Teaming

March 27 - 28, 2020 Omni Barton Creek Resort and Spa – Austin, TX

All AIAMC Meeting Space is on the Main Level of the Resort

Friday, March 27th All AIAMC Meeting Space is on the Main Level of the Resort	
1:30-2:30 pm Darrell Royal Ballroom	Keynote Address <i>Frances Johnston, PhD, CEO and Founder, Teleos Leadership Institute</i> <i>The Being a Resonant Team session is all about moving from theory to practice – how you implement leader and member behaviors that will create healthy and high-performing teams. As healthcare is increasingly characterized by interdisciplinary teams it is critical to attend to not only WHO is around the patient but also HOW the work gets done. As teams quickly come together and disassemble, leaders and members must be intentional about creating a team environment where everyone can thrive. A healthy and resonant team leads to open communication and effective collaboration which ultimately provides the best outcomes for the patient. In this session, Dr. Johnston will invite participants to learn experientially by considering their own teams and how they can implement best practices back at work.</i>
