Founded in 1898, the American Association of Colleges of Osteopathic Medicine (AACOM) is the leading voice for the education and training of physicians who practice osteopathic medicine in settings across the medical spectrum—from primary care to the full range of medical specialties. We support our member colleges of osteopathic medicine in their efforts to attract and train individuals who are fueled by a desire to make a difference in our healthcare system by treating the whole person and building a future emphasizing health and wellness for all people. Today, more than 38,000 future physicians—close to 30 percent of all U.S. medical students—are being educated at one of our colleges of osteopathic medicine.

The mission and vision of the Alliance of Independent Academic Medical Centers (AIAMC) is to serve as a learning organization of independent academic medical centers. As an AIAMC Vendor Partner for the last ten years, [Hall, Render, Killian, Heath & Lyman, P.C.](http://hallrender.com) applauds the AIAMC's commitment and strong position as a leader in supporting independent academic medicine.

Hall Render has focused intently for many decades on matters important to health care organizations, including academic medicine. Whether your legal needs relate to Medicare and other GME funding, rural reclassification, multi-campus hospitals, PATH, ACGME accreditation, Teaching Health Centers/Rural Health Clinics, or resident termination and discipline, Hall Render is committed to the health care industry and serving the needs of teaching hospitals, non-hospital teaching sites, and academic teaching institutions.

On-Site Representative:  
Sarah Ozurumba

The KNN is a national movement to advance flourishing across the health ecosystem through a framework of character, caring, and practical wisdom. We partner with health institutions to unlock their full potential and achieve excellence through flourishing-centered cultures that transform organizations and elevate everyone.

Our strengths-based methods combine a robust guiding framework, scholar-practitioner approaches, deep subject matter expertise, and national peer collaboration to solve complex culture and workforce challenges. We help institutions harness their strengths to build cultures where all who learn, work, receive care, or lead in health can flourish.

**MyEvaluations: Bronze Sponsor**

On-Site Representative:

David Melamed, MD

MyEvaluations helps independent academic medical centers turn assessment and accreditation work into something practical, efficient, and meaningful. Built by clinicians for real-world GME environments, our platform uses AI to reduce administrative burden while improving the quality of evaluations, feedback, and program oversight. From narrative-driven assessments and milestone alignment to CCC-ready dashboards and institutional reporting, MyEvaluations transforms everyday clinical observations into actionable insight. Our AI tools support faculty with guided prompts, reduce variability and bias, and help leadership see trends without adding extra work. The result is clearer decisions, stronger learner development, and better alignment with accreditation and quality goals. At the AIAMC 2026 Annual Meeting in Carlsbad, we look forward to partnering with teaching hospitals and health systems that value independence, innovation, and outcomes that truly support education, operations, and patient care. Let's make GME work smarter, together.

**Paradigm Medical Systems: Bronze Sponsor**

Specialists in realistic OB/GYN and childbirth simulation. Providing class leading task trainers, hand-built using unique materials and designed for clinical fidelity to drive development of useful muscle memory. A proprietary flesh-like material is molded around functional skeletal systems to create a platform with remarkable tactile realism, enabling lifelike application of complex maneuvers alongside key micro-skills. Our most popular model, Sophie and Her Mum, pairs a fetal model that is birth weight (7.5 lbs) and has a fully articulated skeletal system with a maternal pelvic model containing a replica bony pelvis. The result is a highly precise simulation for skills ranging from basic hand placement to posterior arm retrieval. Our other models accommodate specific skillsets, such as OVD, pelvic exams, and cervical checks.

Bring remarkable realism to common procedures alongside low-volume high-risk emergencies, improving outcomes for educators, providers, and patients alike. Experience the gold standard in women's healthcare simulation for yourself!

**Thalamus: Bronze Sponsor**

**Thalamus** is a public benefit corporation and the premier, cloud-based interview management platform designed specifically for application to Graduate Medical Education (GME) training programs. The software streamlines communication by eliminating unnecessary phone calls/emails allowing applicants to book interviews in real-time, while acting as a comprehensive applicant tracking system for residency and fellowship programs. Thalamus provides comprehensive online interview scheduling and travel coordination via a real-time scheduling system, video interview platform, AI application screening/review tool (Cortex) providing technology-assisted holistic review, and first-in-class analytics dashboard (Cerebellum). Now featured nationally at over 800+ institutions, 8,000+ residency and fellowship programs, and used by nearly all applicants, Thalamus is the most comprehensive solution in GME interview management.

The AAMC Electronic Residency Application Service® (ERAS®) program is a foundational part of the transition to residency ecosystem and supports students, programs, specialties, and schools. For over 30 years, the ERAS program has been the gold standard in medical residency and fellowship applications, trusted by over 131 specialties and more than 10,000 programs. Through our strategic collaboration with Thalamus, we are accelerating innovation in the transition to residency by enhancing interview scheduling, recruitment analytics, and mission-aligned selection and retention.

Look to the AAMC and ERAS program for:

- Secure residency application management.
- Data that is reliable, timely, and supports decision making.
- Resources like AAMC Careers in Medicine, FIRST (Financial Information, Resources, Services, and Tools), and Visiting Student Learning Opportunities™ (VSLO®) that help students prepare for a successful transition to residency.
- Partnership with other leaders in the transition to residency in providing the data that power the Residency Explorer™ tool.

The AAMC has rapidly accelerated the pace of innovation across ERAS platforms. New features are transforming the way the ERAS program supports aspiring doctors and the entire medical education community. Learn more: <https://engage.aamc.org/eras>
